2. **Stay with your friend**
3. **Talk with authorities**

*The underage person who is receiving medical assistance is also immune from prosecution. This immunity applies to public and private property.*

Call 9-1-1 if you see the following signs of alcohol poisoning:

- Passing out, semi-conscious
- Cold, pale, or bluish skin
- Vomiting
- Slow or irregular breathing
- Confusion or slurred speech
- Seizures

**Blood Alcohol Content can continue to rise after someone passes out - do not leave your friend alone to sleep it off!**

**Myth: Beer and wine are safer than liquor.** 🚫

**Fact: Alcohol is alcohol. It can cause problems, no matter what kind you consume.** 🚫

**Myth:** If I eat a big meal before I drink, I won't get drunk. 

**Fact:** Food does not prevent alcohol from affecting your body. The alcohol still enters your system. It may be delayed a bit by the food, which will slow the rate of absorption, but you can still get drunk.
